EndNote™

Accelerate your institution's research with EndNote™

Get the reference management software that helps your students and faculty focus on what truly matters – conducting and sharing their research.

Academic researchers routinely collaborate on a global scale, and the ability to work remotely is increasingly important.

Manually creating, maintaining and sharing reference lists is time-consuming, particularly when managing input from collaborators. In fact, researchers worldwide waste nearly 200,000 hours per year formatting citations.

From undergraduates to tenured faculty, EndNote™ 20 helps researchers at all stages save time, stay organized, collaborate with colleagues, and get published. With tools that simplify the process of finding and editing PDFs, automate bibliography creation, help with large-scale literature reviews, and allow sharing, your researchers can focus on what matters most: their ideas.

Subscription journal content in one click

Your researchers can initiate a search for full-text PDFs across all of your institution's subscriptions and freely available sources. When an article is found, EndNote automatically attaches it to the related reference. Then, your users can read and annotate PDFs that open full size.

Seamless organization

Your researchers can easily stay organized with a reliable system that stores unlimited references and provides powerful tools to help organize and manage references with ease and speed.

Easy collaboration

EndNote 20 offers flexible solutions for sharing that help everyone stay on the same page. Up to 100 people can work from a single reference library, no matter where they are located or what organization they are affiliated with. Your researchers can give read and write or read-only access to all or only a portion of their library.

7,000+ reference styles

Your researchers can automatically build their bibliography with EndNote's Cite While You Write tool in Microsoft Word, with access to a library of more than 7,000 styles – more than any other reference tool – or they can customize their own style.

Robust support

EndNote is compatible with both Windows and iOS, and both you and your researchers can access on-demand training from our product experts 24/7. An EndNote site-wide subscription includes set-up assistance for you and your IT team to ensure that you get up and running quickly, and access to our industry-leading support team to help solve problems if any arise.

To learn more about how a site-wide subscription to EndNote 20 can help researchers across your institution save time, stay organized, collaborate with colleagues, and get published, please contact your Clarivate account manager.
